Adenta, Accra, Ghana | Available for Remote & On-site Roles

BSc Computer Science

Web Development

Cybersecurity

AI & Emerging Tech

PROFILE

Computer Science graduate and aspiring Cybersecurity Analyst with hands-on experience in web development, network management, IT support, and AI-powered digital strategy. Currently building Spydex — a technology company founded in June 2026, launching soon. Combines technical foundations with digital marketing knowledge for a rare hybrid skillset.

PROGRAMMING

- HTML & CSS
- JavaScript
- Python
- PHP
- Java (Academic)
- C++ (Academic)
- SQL & MySQL

TECH TOOLS

- Visual Studio Code
- Git & GitHub
- XAMPP
- Linux OS
- Nmap
- MySQL Workbench
- Virtual Machines

CYBERSECURITY

- Ethical Hacking (Academic)
- Network Security Simulation
- Firewall Configuration

PROFESSIONAL SUMMARY

Computer Science graduate with a rare blend of technical expertise and digital strategy knowledge. Experienced in full-stack web development (HTML, CSS, JavaScript, PHP, MySQL), network management, IT support, and cybersecurity principles. Currently building Spydex — a technology company founded in June 2026 and set to launch soon — while actively pursuing cybersecurity certification. My digital marketing and AI knowledge makes me one of the few tech professionals who equally understands how technology is built and how it is used to grow audiences and businesses.

EXPERIENCE

Founder & Web Developer

June 2026 – Present

Spydex Technology — spydex.co

Self-Employed · Pre-Launch

- Building a technology company from concept stage — including brand identity, logo design, domain registration, and web presence
- Applying full Computer Science skillset to design and develop the company's digital infrastructure ahead of launch
- Developing AI-powered product and service strategy aligned with GEO and LLM search visibility principles
- Managing all aspects of business strategy, brand communications, and online presence independently

Technical Assistant & IT Educator

Oct 2024 – Oct 2025

Osu Ringway Estates Basic School

On-site · Contract

- Provided full IT support including software installation, hardware troubleshooting, and system maintenance
- Assisted the school's IT department with technical operations and infrastructure upkeep
- Taught ICT and Mathematics to primary school students, simplifying complex technical concepts for young learners

IT Supervisor & Technical Crew

May – Sep 2022

Twellium Industrial Company

On-site · Internship

- Managed and maintained the company's network infrastructure and computer systems across departments
- Supervised a team of workers, coordinating tasks and ensuring efficient daily operations

- Access Control
- Data Protection
- Vulnerability Assessment

AI & DIGITAL

- GEO (Generative Engine Optimisation)
- LLM Share of Voice
- AI Content Strategy
- Prompt Engineering
- Algorithm Analysis
- Data Analytics

EDUCATION

Knutsford University College

BSc Computer Science
Relevant: Data Structures (C++/Java/Python), Networking, AI & Machine Learning, Database Systems, Cybersecurity
2020 – 2024

CERTIFICATIONS

CompTIA Security+

Target — 2026

Google Analytics

In Progress

Meta Blueprint

In Progress

- Handled system troubleshooting, software updates, and network performance monitoring

IT & Mathematics Tutor

Dawa D/A Basic School

Sep 2024
On-site · Contract

- Assisted students with IT and ICT problem-solving across both software and hardware areas
- Taught core mathematics with a focus on logical thinking and problem-solving skills

PROJECTS

TheFinder — Job Search Web Application

Full-Stack Development · Supervised by Dr. Ernest Gyebi

- Built a dynamic web platform connecting job seekers with employers using PHP, MySQL, HTML, CSS, and JavaScript
- Designed and implemented user authentication, job listing management, and search functionality
- Created a responsive, user-friendly interface with clean navigation and secure login system

Network Security Simulation

Academic Cybersecurity Project

- Configured virtual machines to simulate secure enterprise network environments
- Tested and implemented security measures including firewall setup, intrusion detection, and access control policies
- Demonstrated understanding of network vulnerability assessment and threat mitigation strategies

Spydex Portfolio Website

Personal Project · samuelpomaney.github.io

- Built and deployed a fully responsive single-file HTML portfolio website with embedded photo, animations, and a working contact form via Formspree
- Hosted on GitHub Pages with zero backend infrastructure — demonstrating practical frontend development and deployment skills

TECHNICAL SKILLS OVERVIEW

Languages	HTML/CSS · JavaScript · Python · PHP · Java · C++ · SQL
Databases	MySQL · XAMPP · Database Design · Query Optimisation
Security	Ethical Hacking · Network Simulation · Firewall Config · Nmap · Access Control
AI & Tech	GEO/LLMO · Prompt Engineering · Algorithm Analysis · AI Content Strategy
Tools	Git · GitHub · VS Code · Linux · Virtual Machines · Google Analytics

AI & EMERGING TECH EDGE

Actively building expertise in GEO (Generative Engine Optimisation) and LLM share of voice — the emerging discipline of making brands visible in AI-powered search results like ChatGPT, Perplexity, and Google AI Overview. As someone with a Computer Science background who also deeply understands digital marketing and content strategy, I sit at a unique intersection that most tech professionals do not occupy. This means I can contribute to both the technical build of AI-driven products and the strategic layer of how those products are positioned for maximum visibility and adoption.
