

# SAMUEL DZIEDZORM POMANEY

SOFTWARE ENGINEER · CYBERSECURITY ANALYST · FRONTEND DEVELOPER

+233 204 605 036 | samuelpomaney@gmail.com | samuel-portfolio-pearl.vercel.app | github.com/samuelpomaney  
Adenta, Accra, Ghana | Available for Remote & On-site Roles

BSc Computer Science

Web Development

Cybersecurity

AI-Fluent

## PROFILE

Computer Science graduate and aspiring Cybersecurity Analyst with hands-on experience in modern frontend engineering (React, Next.js, TypeScript), networking, and IT support — plus working knowledge of effective AI tool use. Currently building Spydex — a technology company founded in June 2026. Combines technical foundations with digital marketing knowledge for a rare hybrid skillset.

## SOFTWARE ENGINEERING / WEB DEVELOPMENT

- Web Development
- Frontend Development
- Software Engineering
- React
- Next.js
- TypeScript
- Tailwind CSS
- JavaScript / TypeScript-based Development
- Responsive Web Design
- UI Development
- Component-based Development
- Framer Motion
- Web Performance Optimization
- Accessibility
- SEO Implementation
- Git / GitHub

## TECHNOLOGIES

- React
- Next.js
- TypeScript
- Tailwind CSS
- Framer Motion
- JavaScript
- Git
- GitHub

## CYBERSECURITY

- Cybersecurity
- Web Security
- Application Security
- Network Security

## PROFESSIONAL SUMMARY

Computer Science graduate with a rare blend of modern frontend engineering and cybersecurity fundamentals. Build fast, accessible, component-based web interfaces with React, Next.js, TypeScript, Tailwind CSS, and Framer Motion, backed by full-stack experience in PHP and MySQL. Comfortable across networking fundamentals (TCP/IP, DNS, routing, switching), Linux systems, and core cybersecurity practices (web, application, and network security, security monitoring). Currently building Spydex — a technology company founded in June 2026 — while actively pursuing cybersecurity certification. Also comfortable using AI tools — Claude, ChatGPT, Gemini, and Kimi — to speed up research, debugging, and documentation, while keeping full ownership of architecture and security decisions.

## EXPERIENCE

### Founder & Web Developer

June 2026 – Present

**Spydex Technology** — [spydex.co](#) · Self-Employed · Pre-Launch

- Building a technology company from concept stage — including brand identity, logo design, domain registration, and web presence
- Applying full Computer Science skillset to design and develop the company's digital infrastructure ahead of launch
- Developing AI-powered product and service strategy aligned with GEO and LLM search visibility principles
- Managing all aspects of business strategy, brand communications, and online presence independently

### Technical Assistant & IT Educator

Oct 2024 – Oct 2025

**Osu Ringway Estates Basic School** · On-site · Contract

- Provided full IT support including software installation, hardware troubleshooting, and system maintenance
- Assisted the school's IT department with technical operations and infrastructure upkeep
- Taught ICT and Mathematics to primary school students, simplifying complex technical concepts for young learners

### IT Supervisor & Technical Crew

May – Sep 2022

**Twellium Industrial Company** · On-site · Internship

- Managed and maintained the company's network infrastructure and computer systems across departments
- Supervised a team of workers, coordinating tasks and ensuring efficient daily operations
- Handled system troubleshooting, software updates, and network performance monitoring

### IT & Mathematics Tutor

Sep 2024

**Dawa D/A Basic School** · On-site · Contract

- Assisted students with IT and ICT problem-solving across both software and hardware areas
- Taught core mathematics with a focus on logical thinking and problem-solving skills

## PROJECTS

### TheFinder — Job Search Web Application

- Digital Security
- Security Monitoring

NETWORKING

- TCP/IP
- DNS
- Routing
- Switching

LINUX / SYSTEMS

- Linux

DATABASES

- MySQL
- SQL

TECHNICAL TOOLS / ENGINEERING

- Git
- GitHub
- VS Code / Development Environment
- Chrome DevTools
- Lighthouse
- Web Performance Analysis
- Responsive / Mobile Development

AI TOOLS

- Claude
- ChatGPT
- Gemini
- Kimi

EDUCATION

Knutsford University College

BSc Computer Science · 2020–2024

Relevant coursework: Data Structures (C++/Java/Python), Networking, AI & Machine Learning, Database Systems, Cybersecurity

CERTIFICATIONS

CompTIA Security+ — Target 2026

Google Analytics — In Progress

Meta Blueprint — In Progress

Full-Stack Development · Supervised by Dr. Ernest Gyebi

- Built a dynamic web platform connecting job seekers with employers using PHP, MySQL, HTML, CSS, and JavaScript
- Designed and implemented user authentication, job listing management, and search functionality
- Created a responsive, user-friendly interface with clean navigation and a secure login system

Network Security Simulation

Academic Cybersecurity Project

- Configured virtual machines to simulate secure enterprise network environments
- Tested and implemented security measures including firewall setup, intrusion detection, and access control policies
- Demonstrated understanding of network vulnerability assessment and threat mitigation strategies

SPYDEX Portfolio — Cybersecurity, Software Engineering & Digital Growth

Personal Project · React / Next.js / TypeScript / Tailwind CSS / Framer Motion

- Designed and deployed a modern, component-based portfolio showcasing cybersecurity, software engineering, networking, and digital growth work
- Built with React, Next.js, TypeScript, Tailwind CSS, and Framer Motion; deployed on Vercel with full SEO implementation and social-preview metadata
- Optimised for web performance and accessibility, verified with Chrome DevTools and Lighthouse

TECHNICAL SKILLS OVERVIEW

| Area            | Skills                                                                                                       |
|-----------------|--------------------------------------------------------------------------------------------------------------|
| Web Development | React · Next.js · TypeScript · Tailwind CSS · Framer Motion · JavaScript · Responsive Design · Accessibility |
| Languages       | HTML/CSS · JavaScript/TypeScript · Python · PHP · Java · C++ · SQL                                           |
| Databases       | MySQL · SQL · XAMPP · Database Design                                                                        |
| Networking      | TCP/IP · DNS · Routing · Switching                                                                           |
| Security        | Web Security · Application Security · Network Security · Digital Security · Security Monitoring              |
| AI & Tech       | Claude · ChatGPT · Gemini · Kimi · Algorithm Analysis                                                        |
| Tools           | Git · GitHub · VS Code · Linux · Chrome DevTools · Lighthouse · Virtual Machines                             |

AI FLUENCY

Comfortable using AI tools — Claude, ChatGPT, Gemini, and Kimi — to speed up research, debugging, and documentation, while keeping architecture, security, and code-quality decisions fully hands-on. Also building working knowledge of GEO (Generative Engine Optimisation) and LLM share of voice — the emerging discipline of making brands and products visible in AI-powered search results. A Computer Science background paired with a working understanding of digital marketing sits at an intersection most tech professionals don't occupy — enabling contribution to both the technical build of a product and how it gets discovered.
